

# TVM Problem Setup

Either enter 3 of 4 values and solve for 4<sup>th</sup> OR

Enter 4 of 5 values and solve for 5<sup>th</sup>

(Notes: Values can be entered into the registers in any order.

You can clear all five registers, by hitting the key combination “2nd ClrTVM”

Don’t forget to “zero” any register you don’t need for your problem.

Make sure your P/Y value is set to 1 (for any problems in our class). “2nd P/Y”

Enter the values you know, then hit CPT and the register key to actually compute the value.

	Info Given <small>(If given in word problem form)</small>	Adjustment	Value to be used in Calc.		Does Problem Need to be Converted to Another Time Frame? <small>(Mthly? Semiannual?)</small>
